Tradesmen's Belts

Buckaroo belts have been designed to freely mould the contours of the wearers body making it comfortable over long periods. The wide padded belts offer some back support and relief from back strains. The underbelt is made from 5mm thick waterproof felt and 3mm thick reinforced rubber. The tool upper belt is made from 4mm thick Copolymer coated webbing and is fully adjustable to support tool frogs and nailbags. Belts are available size 32" and above and can be manufactured left handed.

Fully adjustable Shoulder Braces. Attaches to clips on all Buckaroo Belts and designed to better distribute weight of belt.

The Carpenter's Range

Available from February 2007

We are proud to introduce a series of new products specifically designed to suit the Carpenter. Our products have been designed by tradespeople themselves allowing for us to focus on quality, durability and strength whilst fulfilling their requirements. Quality raw materials including First Grade leathers, stainless steel welded fittings and nylon bonded sewing threads combined with proper manufacturing techniques allows for us to create products that will last for years to come.

WB50B
